- 64.....Young Tom Ennis / Jimmy Ward's

Ed's Tunebook

Transcribed and compiled by
Ed Yother

<http://edyother.com>
ed@edyother.com

This a collection of tunes transcribed, for the most part, the way that I play them, in the sets that I usually play them. This is mostly an experiment in learning to put together something like this using only command line tools (a text editor and a bash script), as well as getting some more practice writing music notation.

The tunes and sets are in no particular order. The pages are formatted so that each page is a set that I play when I perform, and for that reason some of the tunes are repeated.

If you happen to catch any errors let me know, especially if I have incorrectly attributed a tune's composer.

The few tunes in here that I have composed are included under a Creative Commons Attribution License 3.0. Use them however you like, as long as I get credit. More info at <http://creativecommons.org/licenses/by/3.0/us/>

If you're curious about what tools specifically I've been using to put this together, here you go. After these few years since starting this project, I think I started it sometime about 2010, here's what I've settled on so far.

For writing and editing the tunes themselves: EasyABC -- It's a text editor that does syntax highlighting for abc music, provides a live preview of the final sheet music as you type, and does midi playback, which is invaluable for making sure I transcribed the tune correctly. It does have the ability to export the sheet music as a pdf, although it doesn't have all of the formatting options available of abcm2ps, which I will describe next.

For converting the .abc file into a .pdf: abcm2ps -- this is a command line tool which I have been using in Linux. It is supposed to be cross platform, but I don't have any experience there. I wrote it into a bash script, which you can find at <http://github.com/edyother/abc2pdf.sh>
